About Coach Cliff
Coach Cliff first discovered his passion for GaGa Ball at a daddy/daughter campout. He was amazed that kids of all ages and their parents could participate in a game that had lots of movement and exercise, while maintaining great competition, fun and excitement for everyone involved. As a game that’s great for any group size and skill level, Coach Cliff saw GaGa Ball as a way to bring parents, kids and communities together.

About GaGa Ball

GaGa Ball is believed to have originated in Israel. Ga means “hit” or “touch,” in Hebrew. In the rules of GaGa Ball, the ball must touch the ground two times before it is considered in play, hence the name. The object of the game is to hit the ball at or below opponents’ knees to eliminate them from the pit. The last player left in the GaGa Ball pit is the winner.

What makes GaGa Ball great is that kids of any size, age, or athletic ability can basically have the same chance to win as anybody else. Games generally last only minutes, and eliminated players are back in the action quickly. Once a player is out, they can have as much fun watching and cheering while the other players finish the game. Last person remaining wins. Then, a new game starts all over and you’re back in the action!

GaGa Ball Pit Options

You decide the shape (Octagon or Hexagon) and wall length for your GaGa Ball pit based on space available and number of kids playing. Our recommendation for the Oct 30H is to build with 8 ft walls to keep the game moving and competitive. Either the 8 ft or 10 ft lengths work well with Hexagon models or GaGa Ball pits that need to accommodate multiple wheelchairs.

Our Octagon 30H brackets come in a variety of color options! Our most popular and largest size.

- **Octagon**
  - Available Heights: 44", 30", 24"
  - Our Octagon bracket systems come with 8 corner brackets, hole drill template, fasteners and assembly instructions.

- **Hexagon**
  - Available Heights: 14.5", 18"
  - Our Hexagon models are great for smaller crowds and available space.

**Gaga Ball Pit Quick Connect Kit**

If portability is important for frequent set up and take down, our Quick Connect Kit allows you to assemble and disassemble your pit within minutes. Once your pit is initially assembled, just set the pit walls together and spin the hand knobs to tighten. Designed to use lighter weight lumber, such as 1 x 4" or 1 x 6" lumber to move and store easily. Available for 30H and 24H models.

**Step 1:** After you purchase your lumber, double check board length and mark holes.

**Step 2:** Countersink holes and drill holes.

**Step 3:** Attach boards and tighten all bolts. Check for any sharp edges or splinters and file down.

**Step 4:** (optional) If building any Cut-Outs, simply follow the included instructions, which are included in all 30H model orders. For the 24H models, Cut-Out instructions are available upon request.

Do-It-Yourself Assembly... Easy as 1-2-3!

Have Fun!

Lumber Options

Natural Lumber

Lumber can be purchased from your local home improvement store or lumber yard. Our suggestion is to purchase 8 ft or 10 ft treated or untreated lumber boards. Plywood can also be used for more portable pits. See our website for more lumber sizing suggestions.

Structural Composite Lumber

We provide an alternative option to natural wood that is virtually free from splintering, warping, sagging and rotting. This recycled plastic lumber product is manufactured from high quality HDPE (High Density Polyethylene), ultraviolet stabilizers, colorants and fiberglass strands to increase rigidity. Available in a variety of colors and made to order. If interested in learning more, please call Coach Cliff.

Portability Options

Cost is based on pit model, lumber color choice, factory countersinking & drilling and ship-to-location. Lumber is shipped direct from the factory. If interested in finding out more, please call Coach Cliff at 877-266-8425 for a material cost and shipping estimate.

Surfaces

A wide variety of surfaces work. Choose to build your GaGa Ball pit on existing asphalt or concrete. Or when placing your GaGa Ball pit on the ground, we suggest you create a barrier to hold down dust or mud from play. Options available to fit a tighter budget include: crushed limestone screening, soft playground mulch, rubber mulch. Other options to consider artificial turf, poured rubber flooring or composite decking. We offer a rubber flooring tile that is custom measured to fit under your GSB® Ball pit. This affordable and easy to install option provides a 0.75” cushion on a slip resistant 6 x 6 tile with a button bottom for drainage. Tiles link together like a jigsaw puzzle. For more information and pricing, please call Coach Cliff.

Patented Corner Brackets

Coach Cliff’s GaGa Ball Pit bracket system is uniquely designed to save you time and money when choosing to build one on your own or considering a pre-fabricated option. The UV protected, powder coated steel brackets create the correct angles to align the wood pit walls – making assembly easy!

Hunter Green is the most popular bracket color and is available on all models. If you want to match the colors of your school, camp, etc., we offer: Blue, Red, Yellow, Orange, Purple, Dark Brown, Black and Hunter Green on the Oct 30H models only.
